Cairo, Egypt

PROFILE

- **Seasoned Software Engineer with 5+ years of experience specialising in backend development, microservices architecture, and enterprise system integration using Spring Boot. Strong experience in building scalable APIs, event-driven systems (Kafka), and integrating distributed services in financial and enterprise environments. Experienced in system customization, modernization, and backend platform enhancements aligned with digital banking and fintech solutions.:**

SKILLS

Backend Development

- **Spring Java**
 - * Spring Boot
 - * Spring Data
 - * Spring Security
 - * Spring Cloud
 - * REST APIs & Microservices Architecture
 - * Kafka, RabbitMQ, Event-Driven Systems
 - * Integration with External Systems (APIs, SOAP)
 - * Keycloak (IAM / OAuth2 / SSO)
- **C#**
 - * Asp .Net Core
 - * Asp .Net MVC
 - * Entity Framework
- **Python**
 - * Flask
 - * FastApi

DevOps

- CI/CD
- Git
- GitHub, Bitbucket, GitLab
- Docker
- Jenkins
- AWS

Frontend Development

- React.js
- Next.js
- React Native (Expo)

Database Management

- SQL Server
- MySQL
- MongoDB
- Postgres

SOFT SKILLS

- **Communication:** Strong verbal and written communication skills, with experience collaborating in cross-functional teams.
- **Problem Solving:** Proven ability to analyze complex problems and develop effective solutions.
- **Teamwork:** Experienced in working collaboratively in agile environments, contributing to team success.
- **Time Management:** Skilled in prioritizing tasks and meeting deadlines in fast-paced environments.
- **Adaptability:** Quick to learn new technologies and adapt to changing project requirements.
- **Leadership:** Experience leading small teams and mentoring junior developers.

EXPERIENCE

- **Flightright** Berlin, Germany (Remote)
Full Stack Developer 03/2025 – 07/2026
 - * **Full-Stack Development:** Developed and maintained customer-facing applications using Next.js and Spring Boot, delivering scalable and high-performance solutions for legal-tech and claim management platforms.
 - * **Backend Services:** Designed and implemented RESTful APIs and microservices using Spring Boot, improving system reliability, maintainability, and integration with internal and external services.
 - * **Workflow Automation:** Built and enhanced business process workflows using Camunda BPM, automating claim processing and reducing manual operational effort.
 - * **Frontend Engineering:** Implemented responsive and user-friendly interfaces using Next.js, improving application performance, SEO, and overall user experience.
 - * **System Integration:** Integrated Spring Boot services with Camunda workflows and third-party APIs, ensuring seamless end-to-end business process execution.
 - * **Agile Collaboration:** Collaborated with cross-functional teams including product managers, designers, and QA engineers in an Agile environment to deliver new features and platform enhancements.
- **Bank Albilad** Riyadh, Saudi Arabia (Remote)
Full Stack Developer 07/2024 – 03/2025
 - * **Microservices & Integration:** Developed and supported microservices-based backend systems using Spring Boot, enabling seamless integration between core banking web applications and external enterprise services.
 - * **Event-Driven Architecture:** Implemented and maintained Kafka-based messaging systems linked with Spring Boot services for asynchronous transaction processing, improving system reliability by 20%.
 - * **System Customization:** Customized full-stack banking modules by updating Spring Boot REST APIs and React.js user dashboards to meet evolving security, business, and scalability requirements.
 - * **Platform Modernization:** Contributed to modernization and enhancement of digital banking platforms, optimizing Spring Boot API performance and restructuring internal administrative tools using React.js.
 - * **Testing & Reliability:** Implemented unit and integration testing strategies for Spring Boot components and React.js web layouts, achieving 95% overall test coverage and improving production stability.
 - * **Banking Systems Integration:** Implemented secure API integrations for digital banking services using Spring Security and OAuth2/Keycloak, ensuring reliable communication between Spring Boot backends and React.js frontends.
- **XSonardive** Berlin, Germany (Remote)
Senior Backend Developer 09/2023 – 12/2023
 - * **Cyber Security Backend:** Supported the robust cyber security backend platform using Spring Boot and Spring Security configurations, successfully mitigating potential vulnerabilities by 30%.
 - * **Frontend (React.js) Support:** Provided frontend support by building interactive analytics dashboards using React.js, directly integrating them with underlying Spring Boot REST APIs to improve user experience by 25%.
- **Flairstech (Cubic)** Garbutt, Australia (Remote)
Backend Developer 08/2022 – 04/2024
 - * **Transportation System Backend:** Supported the scalable backend infrastructure of an enterprise mass transportation system leveraging Spring Boot and Kafka, enhancing real-time data processing efficiency by 20%.
 - * **Application Development:** Built multiple modular applications utilizing both monolithic and microservice architectures with Spring Boot, Java, and Hibernate, improving overall system scalability.
 - * **Testing:** Conducted extensive backend unit and integration testing using JUnit, Mockito, and Spring Boot Test libraries, ensuring high-quality architectural components and software reliability.

- **MedadSoft** Cairo, Egypt
Full Stack Developer 03/2021 – 08/2022
 - * **Web Applications:** Supported 10+ web applications and built full-stack software from scratch using Java Spring Boot backends and interactive React.js client interfaces, increasing overall client satisfaction by 40%.
 - * **E-commerce and ERP:** Developed secure e-commerce, accounting, and ERP solutions, using Spring Boot Web MVC for complex workflows and React.js for dynamic admin operations, streamlining operations by 35%.
 - * **Banking Systems Integration:** Implemented secure API integrations for digital banking systems using Spring Boot, OAuth2, and Keycloak, establishing reliable transaction channels and seamless data communication.
- **AlRand Company** Cairo, Egypt
Full Stack Developer 09/2020 – 01/2021
 - * **Accounting System:** Built a complete internal accounting system for the company using a Spring Boot backend and customized React.js reporting tables, reducing human processing errors by 50%.
- **Nandbox Software Solutions** Cairo, Egypt
Software Developer 05/2020 – 09/2020
 - * **Android App Development:** Built a body and face camera center Android app using OpenCV, achieving 90% accuracy in image processing.
 - * **Backend Development:** Developed high-concurrency Java backend infrastructure based on Spring Boot frameworks for a mobile chat application, reducing client data retrieval time by 40%.

PROJECTS

- **Almedad Website:** E-commerce web app for software services with an admin panel dashboard. Built using .NET Core and Angular, increasing sales by 25%.
- **Khaled Elewa for Legal Consultation Website:** Law office website where clients can view case status and session data. Lawyers can store client data, and an admin panel dashboard is provided, improving workflow efficiency by 30%.
- **Riyadhpack Packaging Saudi Arabia Factory Website:** Website displaying factory products, specifications, and 3D models. Includes an admin panel and a contact form, increasing customer inquiries by 20%.
- **Ostora Cloth Factory Production Management System:** System for managing stores, production lines, and designs. Includes reporting and charting features, reducing production delays by 15%.
- **International Federation Website:** Multi-language website with articles, posts, and an admin panel dashboard, increasing user engagement by 40%.
- **Covid-19 CT Scan Detection:** AI model for detecting COVID-19 from CT scan images with 98% accuracy, reducing diagnosis time by 50%.
- **Event Organizing App:** App for organizing event attendance with an admin panel, multi-language support, and barcode generation for attendees, improving event management efficiency by 35%.

EDUCATION

- **The British University in Egypt** :
Bachelor of Informatics & Computer Science, Major in Artificial Intelligence 2018 – 2022

CERTIFICATES

- * Software Development Life Cycle (SDLC)
- * AWS Cloud Practitioner Essentials
- * Critical Thinking

- * Problem Solving
- * Improving Your Thinking
- * Crafting Questions to Make Better Decisions

LANGUAGES

- **Arabic:** Native
- **English:** Fluent
